

## Protecting Control Systems and Critical Government Services

John O'Driscoll, Colin Radford

<sup>1</sup>Department of Premier & Cabinet, <sup>2</sup>Victorian Managed Insurance Authority

The vision of the Victorian Government Cyber Security Strategy is secure and resilient Government information, services, and infrastructure. The strategy purpose is to develop and implement cyber security capabilities to preserve and improve Victoria's:

- protection of sensitive citizen data and new digital citizen services
- continuity and resilience of government services, systems and infrastructure during and following serious cyber threats
- coordination of response to threats and the security and viability of Victorian Government core infrastructure

Victoria's CISO, John O'Driscoll and Colin Radford, CEO of the Victorian Managed Insurance Authority, the key risk advisor to the State will outline the 23 point strategy, the approach, the focus on partnering and risk, progress to date and the challenges for implementation.
