

Managing a Cloud with Confidence

Michael Richardson¹, Adam Eijdenberg¹

¹*Digital Transformation Agency*

cloud.gov.au is a secure application hosting platform for Government web applications and services.

This talk will describe the work done to the platform and supporting systems that enabled the cloud.gov.au team to apply security and continuous deployment practices with confidence - move fast and not break things.

The talk will cover how secrets are created and stored securely, how encryption and certificates are managed and how changes are deployed, tested and promoted through environments in an automated and controlled manner.
