

Building Cyber Warfighters – Overcoming the Cyber Talent Gap by identifying, testing and training the right the talent.

Tom Moore

WithYouWithMe

With over 180 individuals currently involved in the program and 40 already employed, this new pipeline of talent will soon be ready to join companies and safeguard their computer networks, ensuring systems are in place to protect sensitive information and proprietary data from cyber criminals. WYWM's model involves predicting the skill market, testing and matching underutilised talent and training them for deployment in cyber roles.
