

## Threats against critical infrastructure

Christopher Butera<sup>1</sup>

<sup>1</sup>*National Cybersecurity and Communications Integration Center*

Deep dive into the details of the intrusions into US energy and other sectors in the summer of 2017. This presentation will discuss some of the key tactics techniques and procedures and insights used by threat actors against us critical infrastructure. DHS will highlight the lessons learned and how they can apply to the broader community. This presentation will also demonstrate how DHS leveraged a tool called a Tactical Threat Map to better understand this intrusion campaign.
