

Defending a Nuclear Organisation

Chris Stevens¹

¹ANSTO

The Australian Nuclear Science and Technology Organisation situated at Lucas Heights hosts a complex variety of scientific infrastructure, technology and systems all supporting the use of nuclear science to benefit industry, people and the environment. Understanding cyber security risk is critical to ensure these assets are appropriately protected. This talk will discuss some of the challenges we have seen and overcome; what we perceive as the big problems in protecting national critical infrastructure, and recommendations on how to address these.
