

Be Connected - helping people safely explore the internet

Jessica Wilson¹

¹*Good Things Foundation*

There are over 3 million people in Australia who currently do not access the internet and are being left behind in a world where more and more social activity and essential services are becoming digitised. Many of these people are older and when they do start to access the online world, they are at significant risk of scams and other cyber crime. This presentation will explore the issues for older Australians online and the impact the Australian Government Funded program Be Connected is having in supporting people to safely explore the benefits of the internet.
